Weekly Coal Production

Production for Week Ended:
May 27, 1989

See Coal Highlights

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. The Coal Exports and Imports Supplement contains annual as well as detailed monthly data on U.S. coal and coke exports and imports. Another supplement contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price).

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1987*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

Summary

U.S. coal production in the week ended May 27, 1989, as estimated by the Energy Information Administra-

tion, totaled 19 million short tons, approximately the same as the previous week.

Coal Highlights

Distribution of Wyoming Coal, 1988

(Million Short Tons)

Wyoming coal was distributed to 21 States and Canada. Of the total 163.3 million short tons shipped, only about 16 percent remained in Wyoming and 12 percent was shipped to States east of the Mississippi River. Electric utilities received about 98 percent of the total shipments. About 87 percent of the coal was transported by rail.
